

WINTERCROFT

Ram Mask

Designed by Steve Wintercrafter

Materials required

- ☐ Access to a printer and 22 sheets of A4 paper or US Letter paper.
- ☐ Thin card, the type used in cereal boxes is ideal. Thicker card like corrugated card will not bend to the detailed folds. The approximate area of flat card that you need is around 7 large cereal box or around 8 sheets of A3 card.
- ☐ Spray mount, Pritt stick, PVA or something that will stick paper to card.
- ☐ Scissors or a craft knife.
- ☐ Straight forward sticky tape, you can use basic cheap tape but I've found that Scotch Magic invisible tape gives a neater finish.
- ☐ Some spare time – approximately 4 to 6 hours.

Printing instructions

- ☐ The templates are 1:1 scale and are intended to be printed at ACTUAL SIZE on either A4 paper (210mm X 297mm) or US Letter paper (8½" X 11"). In your printer setting please select the type of paper that you are printing on but DO NOT SCALE THE TEMPLATES TO FIT THE PAPER.
- ☐ I have included a 150mm line on the first page of the templates so that you can check the scale. The line should measure 150mm after printing but plus or minus 2mm is acceptable. There is more information on printing the templates in our FAQ section of the website.

Instructions for assembly

Cutting and Folding

1. Having printed the templates on paper, trim them roughly to the approximate size, they don't have to be neat. Trimming off the excess paper makes it easier to arrange the templates on the card.
2. If you are working with reclaimed card unfold your boxes so that you have flat sheets to work with, then glue the templates to the card. When you assemble your mask your templates will be on the inside faces of the mask. First choice for gluing the templates would be Spray Mount. It's available from most art shops but can be expensive. A glue stick is a cheaper alternative and also works really well. Make sure that the templates are well bonded to the card.
3. Cut out the pieces along the solid outlines. Cut the solid outlines only, not the dashes.
4. The fold lines on the templates are marked as either a dashed line representing a valley fold or dashes with dots to represent a mountain fold. This is with the templates on the inside of the mask.
5. Score all of the folds marked on templates with something blunt like an old biro. Score and fold all of your parts.

Dashed line represents
a valley fold.

Dashed line with dots
represents a mountain fold.

Assembly

6. Begin by assembling the horns using the parts on pages 16-21. Start with any edge and find the neighbouring part with matching numbers. Tape together the edges with corresponding numbers for example number 56 joins to number 56. Taping on the outside makes things easier for most parts but if you come to a part that is difficult to tape outside, try taping inside the mask. If a join feels like it is under stress, tape it inside and out to reinforce it. Having built both horns continue to assemble the rest of the head using the same technique and working out from the base of the horns.
7. Once you have built the mask, make the head band following the instructions on the final page and tape it to the inside of the mask. You might need to adjust the band forward or back to get the best fit.
8. You can paint or decorate your mask in any way that you like. Have a look at our website or facebook page for inspiration.

If you run in to any problems or have any questions please check the frequently asked questions on:

WINTERCROFT

Head Band

To ensure the completed mask fits well you can make a head band and fit it inside of the mask.

Instructions for assembly

1. Cut two strips of card to roughly the dimensions below and the tape one end together.
2. Then wrap the band around your head and tape the other end to get a good fit. The band should be snug but not tight.
3. Take the band off your head and tape the tabs to the inside of the mask.
4. You might need to move the tabs around a little until you get it fitting right.

NOT TO SCALE

400mm

Head Band

35mm

60mm

40mm

Cut two pieces of card at these dimensions
