

papercraft Quakeguy instructions

step 6

Glue part 12 to part 11 and the rest of the legs.

If needed, adjust the legs a bit so that Quakeguy's feet are both flat on the ground and he can stand up without falling over.

step 7

Next, glue part 13 to the backside.

step 8

Glue on part 14 en cut out part 15.

step 9

Glue on part 15 as well.

step 10

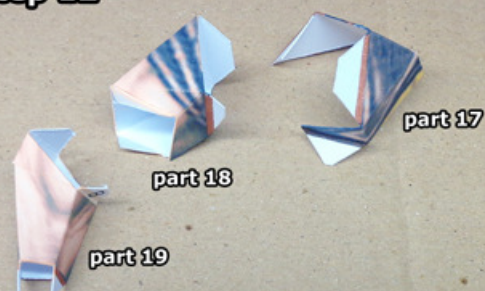

Cut out and assemble part 16.

step 11

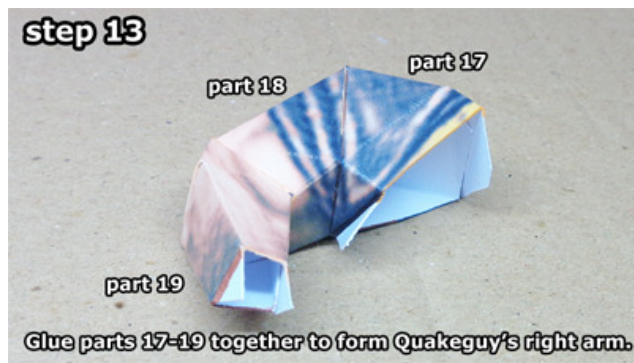

Glue part 16 to the rest of Quakeguy's body.

step 12

Cut out and assemble parts 17-19.

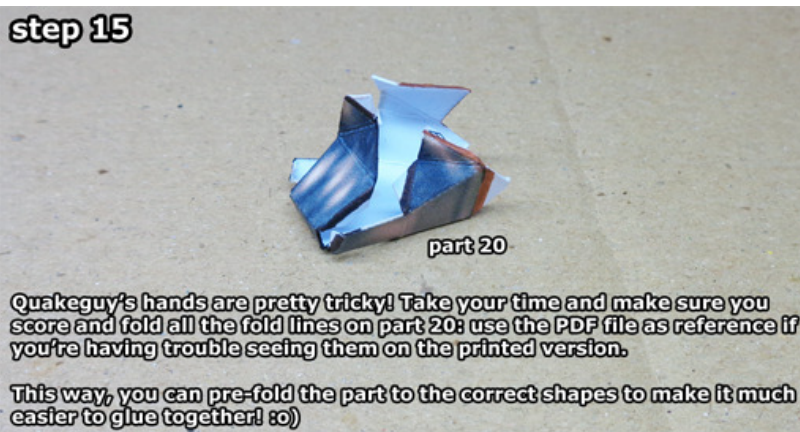

step 13

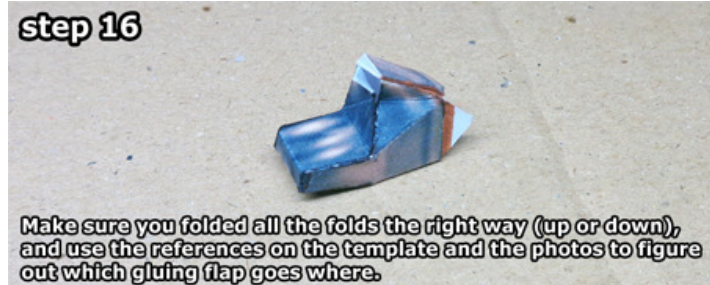

step 14

step 15

step 16

step 17

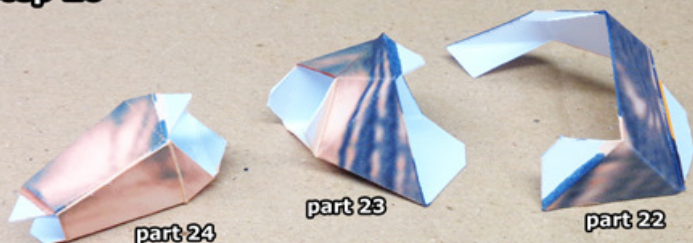

step 18

step 19

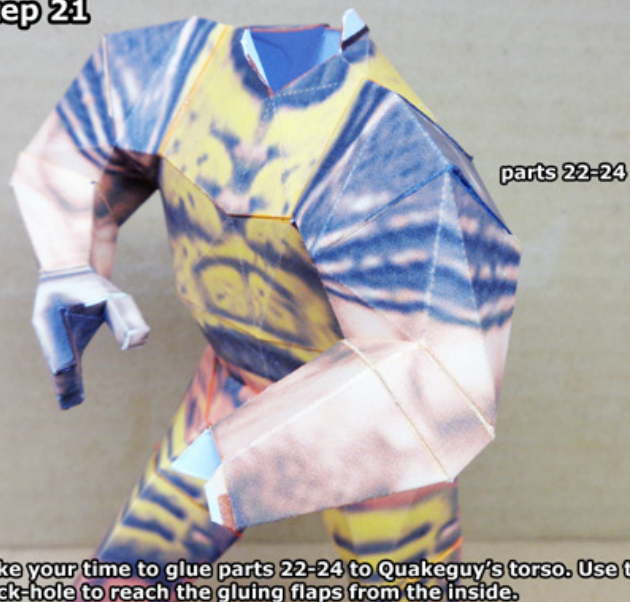

step 20

Now cut out and assemble parts 22-24 as well.

step 21

Take your time to glue parts 22-24 to Quakeguy's torso. Use the neck-hole to reach the gluing flaps from the inside.

step 22

Take your time to cut out and pre-fold Quakeguy's left hand to make it much easier to glue it together in the right shape.

step 23

Now glue Quakeguy's left hand together. :o)

Then cut out and assemble part 27 as well and glue it on as Quakeguy's thumb.

step 24

Glue Quakeguy's hand to his arm.

step 25

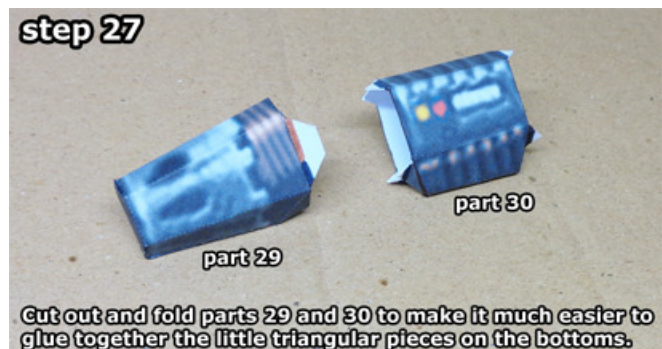

Cut out and glue together Quakeguy's head.

step 26

Now glue Quakeguy's head to... Well, I hope you know where his head goes. :op

step 27

Cut out and fold parts 29 and 30 to make it much easier to glue together the little triangular pieces on the bottoms.

step 28

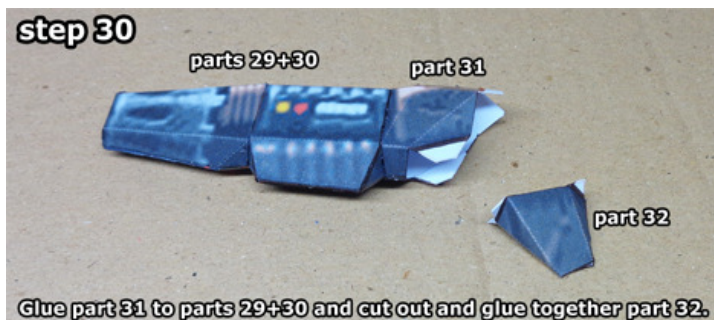

Glue together parts 29 and 30. Use a thin tool to reach the gluing flaps inside the gun.

step 29

Take care folding part 31 to give it the right shape.

step 30

Glue part 31 to parts 29+30 and cut out and glue together part 32.

step 31

Take your time to glue part 32 to the bottom of part 31. Then make sure you scored and folded all the fold lines on part 33 and glue it together as well.

step 32

Glue part 33 to the back of the gun.

step 33

Carefully adjust the hands so that Quakeguy can hold the gun in his hands without glue.

If necessary, also adjust his feet and legs some more so he won't fall over.

Thank you for building a ninjatoes' papercraft model! :o)
